

Exquisite Highlights

High accuracy & High efficiency
Resin 3D Printer

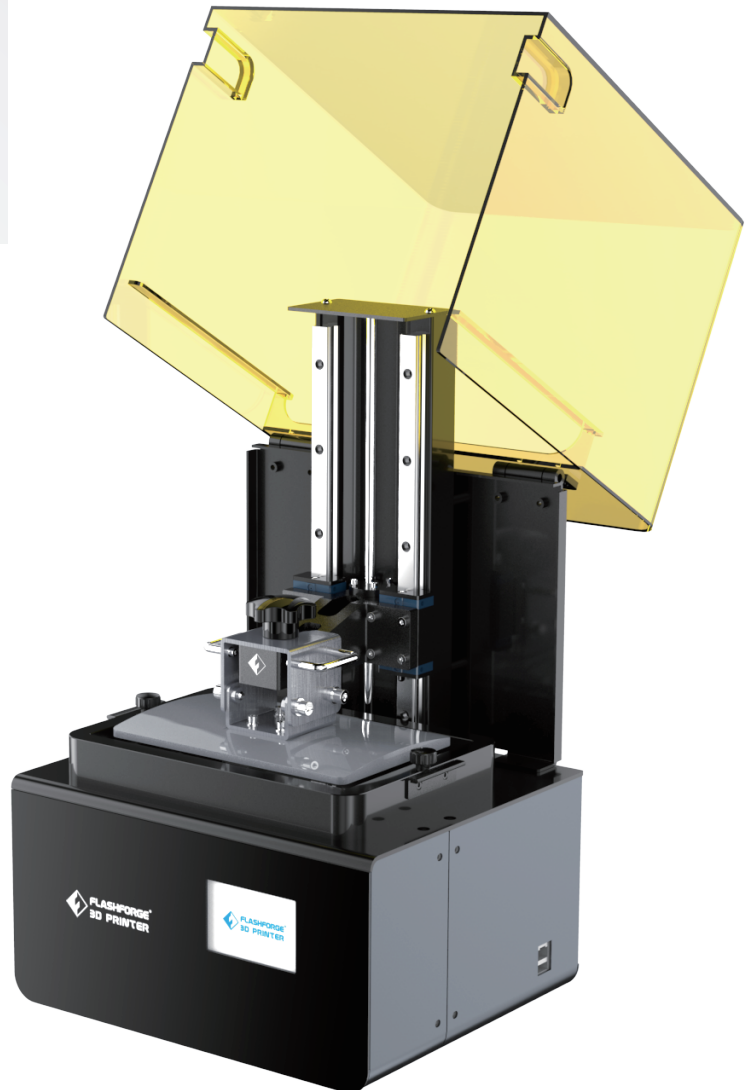

Foto 8.9s

Flashforge Newest Arrival HD 4K LCD printer

◆ Larger Build Volume

Build volume 192*120*200 mm, bring industry designers and makers more possibilities.

◆ More Stable Framework

The Z-axis is supported by dual linear rails, rod motor and clearance nut combination which dramatically improves stability while in motion and reduces the risk of layer shifting. Cooling device for stable printing performance and longer service life.

◆ Stabler Printing Performance

The optical engine system developed by Flashforge allows the difference in energy distribution to be less than 10%. In this way, more than 90% of the print is promised in its accuracy and success rate is improved by 30%.

◆ Faster Print Speed

High quality 8.9 inch 4K industrial grade monochrome and new matrix design for uniform UV light energy and deliver high-quality prints. The print speed is 50mm/h, making printing speed 3X faster than colour screen.

◆ Better Print Experience

Resin includes basic resin and water-washed resin. The material has good strength, easy to clean, and more detailed performance. Professional slicing software, easy to use, more functions, and smoother printing models.

Specifications

Printing Speed	10-50 mm/H
Build Volume	192*120*200 mm
Layer Res	0.025-0.2 mm (Adjustable)
XY Res	0.05 mm
Light Wavelength	405 nm
Z-axis	Industrial grade dual linear rails
LCD Screen	8.9 Inch 4K industrial grade monochrome
Build Plate	Matte Plate (More Adhesive)
Tank Volume	0.5L
Connectivity	USB
Power	120W
Printer Size	305*264*490mm
Operation Screen	3.5 inch touch screen
User Friendly	Easy to replace the LCD screen
